NTE56019 thru NTE56021 TRIAC, 25 Amp

Description:

The NTE56019, NTE56020 and NTE56021 are 25 Amp TRIACs with a repetitive peak blocking of 200V, 400V and 800V respectively. These devices may be gate triggered from a blocking to conduction state for either polarity of applied voltage and are designed for AC switching and phase control applications such as speed and temperature modulation controls, lighting controls, and static switching relays. The triggering signal is normally applied between the Gate and MT₁.

Features:

- Electrically Isolated TO220 Type Package
- Glass-Passivated Junctions
- Surge Capability: Up to 400A

Absolute Maximum Ratings: (T_A = +25°C, 60Hz, with a resistive load unless otherwise specified)
