J-SSA-2 Analog 60W Soldering Station

Description:

The J-SSA-2 Soldering Station offers adjustable temperature from 5 watts up to 60 watts. Advanced temperature control circuitry allows for precise control on a hand soldering unit. This station is supplied with a built-in iron stand, tip cleaning sponge, flux, and includes a spooled solder holder.

Technical Parameters:

- Power Consumption: 60W
- Power Supply Voltage: AC 110V \pm 10% 60Hz
- Display Type: Analog Dial
- Temperature Range: +392° to +932°F (+200° to +500°C)
- Iron Tip Loss Voltage: < 5mV
- Weight: 0.68kg

Performance:

- Display Type: Analog Dial
- Iron Sleep State: No
- Automatic Shutdown: No
- Celsius/Fahrenheit Selection: No
- Temperature Calibration: No
- Memory Storage: No

WARNING: This product contains, and when used for soldering or similar applications, produces chemicals known to the State of California to cause cancer and birth defects (or other reproductive harm).
