FOCCUS™

FOCCUS Combination Cleaning™

Clean first time... Every time!

Connector contaminated with dirt & oils

Connector after FOCCUS™ Combination Cleaning™

FOCCUS products are designed for optimal cleaning of connectors using Combination Cleaning™ process. The end face is passed through a lightly moistened spot on the lint-free wiper, then drawn into the dry area. The large cleaning platform assures the proper angle for UPC and APC connectors.

FOCCUS CCT or QbE cleaning platforms can be used with a FOCCUS Precision Cleaning Pen for optimal results.

Effective on common soils:

- Finger oils
- Mineral oils and grease
- Gels & pulling lubricants
- Dust, dirt & carbon
- Water & salt residue & more

Combination Cleaning is industry proven, exceeding IEC 61300-3-35, IEC TR62627-01, and meeting Telcordia GR-2923-CORE and SAE Aerospace AIR6031.

Chemtronics offers certification training for the Combination Cleaning process, teaching the right process with the right products.
