A technological advance over halogen bulbs!

LED LEFFLECTOR™
from Coast LED Lenser

It’s true. You can literally install the Coast LED Lenser Lefflector and forget it for up to 30 years. Even better, the Lefflector costs 90% LESS to operate than halogen bulbs—just pennies per year. That makes Lefflectors the ideal replacements for MR16 halogen bulbs in everything from indirect track lighting to landscape accent lighting. Designed for extreme energy efficiency, brilliance, and durability, each Lefflector will provide up to 50,000 hours of convenient, energy-saving performance.

- REPLACES MR16 halogen bulbs up to 20 watts
- More than 10 times as ENERGY EFFICIENT
- Burns for 50,000 HOURS—more than 5 years of continuous use, more than 30 years if used 4 hours a day
- Patent-pending Coast LED Lenser Reflector Technology for INCREASED BRIGHTNESS

Available in true bright white, warm white, and colored beams—in flood or spotlight configuration. (See other side.) The Lefflector is always the right choice for brilliant, beautiful, energy-efficient lighting.
LEFLECTORS are available in a wide variety of colors and configurations—there’s one for every application

- The 12-volt Leflector provides same amount of light as 20-watt halogen
- Coast LED Lenser Reflector System for increased brightness
- 50,000 hours of service
- No filament to break or wear out
- Constant light

**PARABOLIC LEFLECTOR**
- Parabolic reflector collects and focuses light
- Adjusts to flood OR spot beam; just turn knob at center
- Clear white light

**FLOOD LEFLECTOR**
- Wide beam illuminates larger area

**SPOT LEFLECTOR**
- Colored LEDs provide true colored light—not just filtered through a colored bulb
- Spotlight beam highlights interior or exterior feature
