268 Flux-Cored Wire

THE CORED WIRE FOR
ROBOTIC SOLDERING

KESTER 268 FLUX-CORED WIRE IS A ZERO-HALOGEN WIRE OPTIMIZED FOR ROBOTIC SOLDERING APPLICATIONS FEATURING:

- Low occurrence of solder ball spatter
- Low smoke and odor
- Clear residue, resulting in excellent joint aesthetics after soldering
- Excellent surface wettability and spreading suitable for robotic soldering and manual soldering
- Excellent manufacturing consistency and uniform quality, minimizes defects for all types of soldering
- Excellent wetting speed and spread; superior to halogenated materials
- Classified as ROL0 per J-STD-004B
