

SUREHOLD®

Adhesives for every application

SELF-MIXING

90 SECOND EPOXY

EPOXY IS MIXED AS IT IS DISPENSED!

- A rapid curing, two-part, general purpose epoxy for projects that require instant adhesion
 - Will not shrink, fills gaps and is nearly colorless
- Syringe automatically mixes the epoxy hardener and resin during application
 - Nozzle mixes the epoxy as you push down on the plunger
 - Eliminates the guess work in measuring the right amount of epoxy hardener and resin
 - Eliminates hand mixing and messy cleanup
 - Apply mixed epoxy directly to your project or repair
- Use with or without the self-mixing nozzles ... Your preference
 - **With the self-mix nozzles**, simply attach nozzle, push down on plunger and product is mixed as it goes through the nozzle
 - **Without the nozzle**, push down on the plunger to release equal portions of hardener and resin then hand mix the epoxy the traditional way
- All purpose, works on most hard surfaces. Use on:
 - Metal, Ceramic, Glass, Rubber, Wood, Plastics, Fiberglass
 - Use to repair furniture, appliances, toys, models, jewelry, china ...
 - Hardware, Automotive, Craft & Hobby Applications
- Rapid curing, sets in 90 seconds
- Water Resistant
- Dries Clear
