Complete Line of Quality IPA Products

Techspray has the broadest line of isopropyl alcohol (IPA) in the industry, ranging from aerosol, pre-saturated wipes, and bulk packaging. Two grades of IPA are available: 99.8% anhydrous (containing as little water as possible) for fast-drying cleaning and flux thinning, and 70% IPA / 30% DI for stencil and other cleaning when slower evaporation is desired.

All presaturated wipes are made of low linting, tear resistant hydro-entangled polyester or poly-cellulose material.

Specs: 99.8% IPA qualified as ACS reagent grade, fed spec TT-1-735A (amend 3, notice 2) grades A&B, ASTM D770-05
