Zero Charge Anti-Stat Coating

1726

Techspray’s ESD-safe products can help maintain work areas within the ANSI/ESD S20.20 standards set by the ESD Association (www.esda.com). In a static-free environment, the work area, tools and personnel form a circuit (see diagram to right). Electrostatic Discharge (ESD) occurs when the charges of two surfaces with a large electronic potential difference equalize instantaneously. The resulting discharge or spark can cause catastrophic or latent damage to electronic components. ESD programs maintain an equal potential by maintaining continuous contact with ground, avoiding ESD damage. Cleaners, lotions, and coatings are an integral part of an ESD control program.

Anti-static coating for fabrics & flexible surfaces

Fast drying, anti-static coating eliminates static charge and reduces triboelectric generation from flexible surfaces. Ideal for plastics, fabrics, and carpet.

- All-purpose static control
- Non-flammable
- Non-ozone depleting
- For plastics, fabrics, and carpet
- Fast drying

Specifications:

- Meets or exceeds MIL-B-81706B
- NFPA 68A.
- USDA: approved A-4 rated
