

Conductive Trace & Shielding Repair

NEW!

CW2205

CircuitWorks® Conductive Paint

New CircuitWorks^{fi} Conductive Paint is a kit that includes everything needed for both fine trace repairs and painting over larger areas.

Quickly creates conductive silver traces

Superior electrical conductivity

Dries in minutes at room temperature

CircuitWorks^{fi} Conductive Pens and Paint make instant highly conductive silver traces on circuit boards and are used in prototype, rework, and repair of circuit boards by linking components, repairing defective traces, making smooth jumpers and patching EMI / RF shielding.
