

# WIC-102 Tip Installation Instructions

Locate the hole on the camera head, and place your selected tip into the hole.

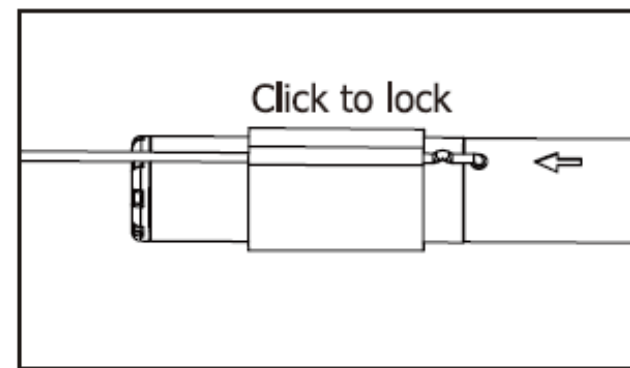

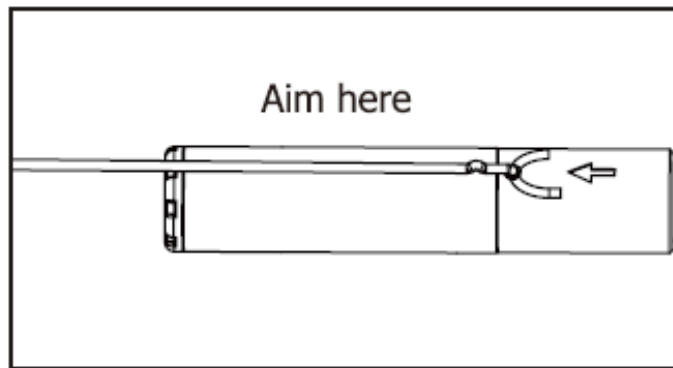

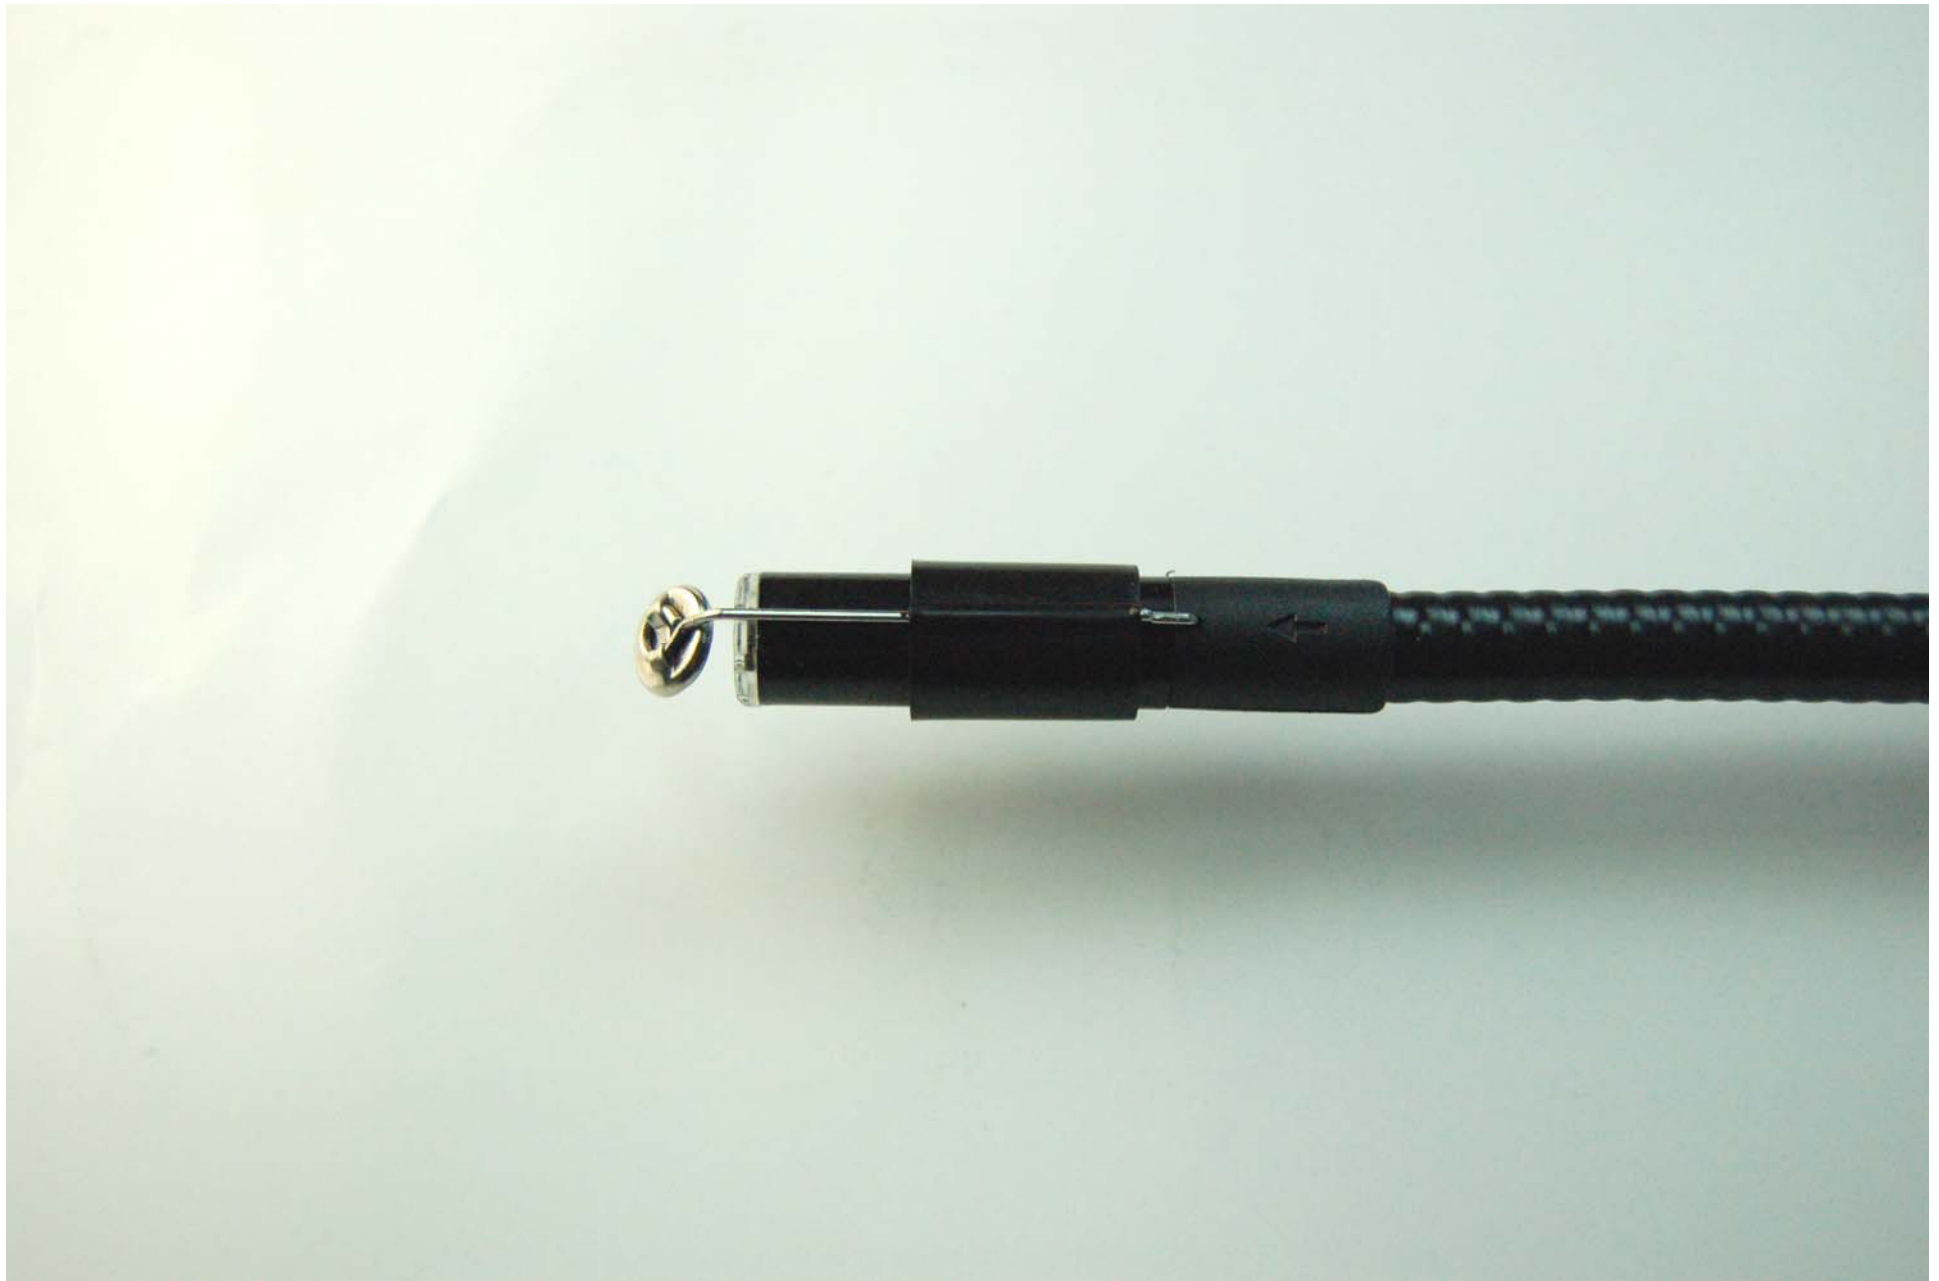

Identify the notch on one of the two plastic parts.  
(one is a spare.)

Make sure the Notch is in position with the tip shaft as the picture shows, and then slide the plastic part into place.

The three included accessories, (mirror, hook, and magnet) all attach to the camera head the same way.

Mirror Tip after installation is complete.
